

Goal: Create a Landing page for Colab

Animated... but what does it entail?
what is my role? what do I have to accomplish?
I have to create a design...
look like? color scheme

thoughts: we are pretty much trying to sell a product, no? or what's the intention behind it?
I'm going to take it as we've built a website that can help students and teachers work better together...

who is it for (our audience)? it includes: self, peer, assessments.

Professors @ Mount Saint Mary College

Why should you use Colab instead of other websites?

Website should include:

→ Link to Youtube video that explains what it is... the basics

→ How to use (professor's pov) & (students?)

What does Colab do?

website that gathers data for self and peer assessments,

What is Colab:

It is a learning management system that collects data from each individual working together in a group setting.

- provides support to both students and professors engaging in collaborative group learning activities
- made to sharpen collaborative skills
- we gather data from Colab and use what fosters better group working skills.

Welcome :-)
